

Lights Out?

RECYCLE.

- They're everywhere ... businesses, schools, offices, hospitals and manufacturing plants. **What are they? FLUORESCENT BULBS.**
- Fluorescent bulbs and some other types of lighting contain mercury. **So what?** When broken or disposed of improperly, these bulbs release mercury – posing a **SERIOUS RISK** to your health and the environment.
- That's why **THE LAW** says that mercury-containing bulbs must be disposed of properly. **What's the answer? RECYCLE.**
- **Why recycle?** You may **SAVE MONEY**, reduce your liability and help **PROTECT THE ENVIRONMENT.**

It's the law.
It's your responsibility.
It's the right thing to do.

For information about recycling fluorescent and other mercury-containing lamps, call **1-800-768-7348** or visit **www.scdhec.gov/brap**.
